

## HOW

# Structure

- Use HTML for structure, CSS for Style
- Headers should be in order and relevant
- Buttons are not Links
- Tab index should only be 0 or -1 only
- Just use a Linter
- For SPA lets users know when things have changed

HOW

# Live Region

```
1 | <div id="clock" role="timer" aria-live="polite"></div>
```

```
1 | /* basic JavaScript to update the clock */
2 |
3 | setInterval(function() {
4 |     var now = new Date();
5 |     document.getElementById('clock').innerHTML = "Time: " + now.getHours() + ":" + ("0"+now.getMinutes()).substr(-2);
6 | }, 60000);
```
